HVAC SPECIFICATIONS SCOPE:
 Mechanical work shall be performed in accordance with the rules and regulations of the 2018 IRC Chapters 12-24 & based on the IMC 2018
 LG Wall Mounted 5-Zone System - 54,000 BTU
 Outdoor - 8k + 9k + 9 + 9 + 12k Indoor - 20 @ SEER 2
 Model: LMS43HV 4 LSN50SHSV LSN120HVS
 Item Number: 151015

ELECTRICAL SPECIFICATIONS SCOPE:
 It is the intent of these specifications and accompanying drawings that the contractor shall, unless otherwise specified herein, furnish all labor, materials, tools and equipment including scaffolding to install the complete electrical system as specified herein. Contractor shall properly install, equip, adjust, and put into perfect operation, the respective portions of the installation specified and so interconnect the various items or sections of the work in order to form a complete and properly operating whole.
RULES AND REGULATIONS:
 Electrical work shall be performed in accordance with the rules and regulations of the 2018 IRC Chapters 34-43 based on National Electrical Code 2017 (NEC 2017), National Fire Protection Association (NFPA), and all applicable state and local codes.
MATERIALS AND WORKMANSHIP:
 All materials shall be new, of the best respective kinds, manufactured by the company or companies.
GROUNDING:
 Electrical Contractor shall be responsible for installing a ground wire with all circuits, branch, and feeder. The size shall be in accordance with the National Electric Code, Article 250, Table 250.95.
POWER WIRING TO OTHER EQUIPMENT:
 Electrical Contractor shall provide all conduit, disconnect switches, wire outlet boxes, and final connections to any piece of equipment furnished by other contractors. The control wiring and starter, if required, shall be the responsibility of the Contractor furnishing the equipment.
MATERIALS AND INSTALLATION:
 In general, branch circuits shall be non metallic sheathed cable, NM-B Romex or equivalent, except where hot or damp conditions require a different type of installation. Minimum size shall be 14 AWG copper.
 All exposed interior and exterior circuits shall be conductors in conduit according to the accepted practices as described in the NEC 2017. Install all conduits parallel or perpendicular to the building surface, grouped together where possible.
FIXTURES:
 The Contractor shall provide lighting fixtures in accordance with the layout indicated on the drawings pursuant to contract. Fixtures shall be equipped with all component parts of metal, glass, ballast, sockets, wiring, self-aligning hangers, and all other accessories as required to make each unit complete and operable in its entirety. Contractor shall be responsible for providing lamps which in all ways meet fixture manufacturers requirements.
 All repairable lamps shall be replaced with new lamps during the course of construction, up to and including the date of
